Hardy Rock Plants

Hav'look Gardens
Fowlerville, Michigan.

FOREWORD

If you do not find in this little catalogue, the plants for which you are looking, if you will write us no doubt we have them or can obtain them for you. We are growing hundreds of varieties not listed in this small booklet.

Our plants are of strong blooming size and if given proper care will give satisfaction in any garden.

On account of the great number of causes of failure over which we have no control, such as poor or improper soil, unfavorable weather, careless culture etc., we can assume no responsibility after the stock leaves the nursery.

TERMS: Cash should accompany all orders. No order will be accepted for less than \$1.00.

We are happy at any time to have visitors call at our gardens. (Garden Clubs are very welcome. If possible let us know a few days in advance of your coming that we may make arrangements for your entertainment.)

Our gardens are located in the rich Livingston County dairy region, and are easily reached over the good gravel roads from the M 16 pavement. We are located three miles south and two and one-fourth miles west of the red light in the village of Fowlerville.

LANDSCAPE DEPARTMENT

We are prepared to design and plant Alpine Gardens, Herbaceous Borders, Naturalistic rock gardens and the development of large or small places. Being growers we have made a study of the requirements of the different plants, this knowledge is necessary to attain the best results in landscape composition. Our men are experienced in planting, our prices moderate and we guarantee our work to give good results. Estimates gladly given.

ACHILLEA

MILLEFOLIUM ROSEA - Finely cut deep green foliage pink flowers in dense heads	.15
NANA - A very dwarf plant, extremely fine cut foliage heads of white flowers, very choice.	.25
SEREICA - Neat grey hummocks of foliage, white flowers, rare.	.25
SERICEA - Silvery grey tomentose leaves, dense clusters of yellow flowers.	.20
TOMENTOSA - Handsome silvery grey carpets and rich golden flowers over a long period.	.15

ADENOPHORA

LILLIFOLIA - Tall spikes of deep purple campanula like flowers, excellent border plant	.25
---	-----

AETHIONEMA

GRANDIFLORA - A lovely little plant with blue green foliage and short dense heads of pale rose flowers.	.25
--	-----

AJUGA

BROCKBANKI - Brilliant bronze purple foliage with GENEVENSIS - Deep green foliage, dense spikes of blue flowers in May and June	.15
REPTANS VARIEGATA - Handsomely variegated foliage and short spikes of blue flowers	.15

ALLIUM

PULCHELLUM - Striking pink heads of blossoms, very fine.	.25
SCHOENEPRASUM - A favorite of old gardens and showing up well in the rock garden.	.15
COERULEA - A very dainty dwarf blue member of this family	.35

ALTHEA

HOLLYHOCK - Tall stately border plants offered in a wide range of colors.	.15
--	-----

ALYSSUM

ARGENTEUM - Hoary grey foliage with deep golden flowers on a foot high plant	.15
IDAECUM - A very choice wee creeping sort with silvery foliage and heads of soft yellow flowers. One of our best plants	.35
REPENS - Much like the above, except about three times as large.	.25
ROSTRATUM - A somewhat shrub-like plant with grey green foliage and deep yellow flowers. Late June.	.15
SAXATILE CITRINUM - A mass of pale yellow flowers much more refined than the following.	.25
SAXATILE COMPACTUM - Basket of gold. No garden is complete without several clumps of this. 10 inches.	.15
SERPULLIFOLIUM - A very fine creeping sort for a choice place in the rock garden.	.25

ANCHUSA

ITALICA - One of our best blue hardy plants. Grows 3 to 5 feet and produces an abundance of gentian blue flowers in May and June	.25
MYOSOTIDIFLORA - Produces quantities of forget-me- not-like flowers on a somewhat dwarf plant. Very fine	.25

ANDROSACE

CHUMBYI - Velvety rosettes crowned by neat heads of rosy flowers	.35
PRIMULOIDES - Tufts of soft green leaves from which spring lovely flowers with golden eyes. Very fine	.25

ANEMONE

JAPONICA - Japanese wind-flowers in soft pink or white. Fine for fall blooms in protected border	.25
HEPATICA - Our fine native hepatica with early blooms.	

spring bloom. A very choice selection	.25
HUPEHENSIS -A Chinese variant of the well known Japonica, rather short with large rosy flowers	.25
PULSATILLA -Huge upstanding deep purple crocus blossoms, silky and shaggy	.25
ANTENNARIA	
DIOICA -Perfectly prostrate silver carpet. Interesting.	.35
ANTHEMIS	
AIZOON -Masses of low silvery grey fluffy foliage. An abundance of white daisy-like flowers	.25
TINCTORIA -Hardy perennial with finely cut foliage and bright yellow flowers	.25
AQUILEGIA	
FLABELLATA NANA -A stout stocky little native of Japan. Big waxy, white and blue flowers	.35
JACUNDA -The marvellous beauty of powder blue and white. One of the finest things we offer,	.50
LONG SPURRED HYERIDS -Like fairy butterflies in the border, Pastel colors, mixed	.25
ARABIS	
ALPINA -Masses of snow white in border, wall or rock garden. Should be missing in no garden.	.15
MURALIS ROSEA -Thick waxy leaves in a pleasing rosette with slender spikes of pink flowers	.25
STURII -A very light and pleasing sort for a choice place in the wall or rock garden.	.25
VARIEGATA (ALPINA) -The finest of variegated foliage resembling holly in shape. Don't miss this	.25
ALPINA FL. PL, True double arabis. Reminds one of a bank of snow when in bloom.	.25
ARENARIA	
GRANDIFLORA -A fine creeping plant with fine deep green foliage and a wealth of white star-like blossoms over a long period.	.25
VERNA -A prostrate moss-like plant. excellent between stone flagging	.15
VERNA AUREA -A golden form of the above for more sunny places	.25
ARMERIA	
MARITIMA -A pleasing rock plant with soft pink flowers.	.15
LAUCHIANA -Bright rose pink flowers freely produced on slender upright stems	.25
ARTEMISIA	
FRIGIDA -A mass of filigree silver, very fine in wall or sunny rock garden.	.25
LACTIFLORA -An excellent hardy border plant producing large branching panicles of sweet-scented creamy white flowers during August and September Fine for cutting;	.25
SILVER KING -The entire color effect frosted silver fine for bouquets or baskets	.15
ABROTANUM -The southern wood of old gardens, very fragrant	.25
STELLARIANA -Finely cut lacy foliage. Will thrive in poor soils	.15
SPECIES -Much more useful in bouquets and cut flower arrangements than Silver King. More dwarf and the branches fuller	.15
ASPERULA	
CYNANCHICA -Dainty clusters of light rose colored flowers above a symmetrical mound of airy stems and foliage. Blooms nearly all summer.	.25
ODORATA -Heads of snow-white foliage. Fragrant.	

Fine as a ground cover in shady places 25

ASTER

ALPINUS -A dwarf perennial aster for the rock garden. Clear lavender ray petals with golden centers	.25
FRIKARTII -"WONDER OF STAFA" Immense blue flowers with a wide golden eye are carried on fifteen to eighteen inch stems over a long period. Very fine	.35
MAUVE CUSHION -Forms a circular cushion-like plant 1 and 1-2 ft. across and rarely exceeding 10 in. in height. Smothered in late autumn with soft mauve flowers	.35
MICHAELMAS DAISIES -Barr's Pink -A strong, vigorous grower, 4 to 5 feet, in height and the brightest pink of any of the hardy asters	.25
FREEDEOM -Masses of large light bluish lavender flowers. early and free	.25
QUEEN MARY -One of the best, large flowers of blue, shaded lavender	.25
NOVAE-ANGLIAE -Bright purple violet during September and October	.25

ASTILBE

HYBRID -Varieties of vigorous growth; producing many branched, feathered heads of flowers. Prefers semi-shady positions.	.35
--	-----

AUBRIETIA

One of the loveliest of creeping plants, splendid for planting in walls and steep rocky slopes. We offer hybrids in mixed shades of violet, lavender and lilac only.	.25
--	-----

VARIEGATED -Strikingly variegated foliage and pleasing lavender flowers. Small plants only	.25
--	-----

BELLIS

PERENNIS -The always charming old fashioned English Daisy with larger flowers than in past years	.15
--	-----

BELLIUM

MINUTUM -Dainty dwarf single lavender daisy	.15
---	-----

BOCCONIA

CORDATA -The large plume poppy, interesting for the back of the border	.35
--	-----

BOLTONIA

LATISQUAMA -One the finest border plants blooming in early autumn with large single aster-like flowers of soft lavender. 5 feet	.25
---	-----

CALAMINTHA

ALPINA -A good rock plant or for the edge of the border. Small purple flowers nearly all summer.	.15
--	-----

CALLIRHOE

INVOLUCRATA -Trailing plant with large saucer shaped flowers of bright rosy crimson. produced all summer.	.25
---	-----

CAMPANULA

CALYCANTHEMA -The oldfashioned but indispensable cup and saucer Canterbury bells. Mixed colors only.	.15
--	-----

BARBATA -A beautiful Alpine with soft blue flowers freely produced.	.35
---	-----

CARPATICA -The familiar hare bell of Southern Europe. Large blue flowers on slender stems.	.15
--	-----

GARGANICA -Lovely in a sunny wall or rock crevice great trailing mats which disappear under the masses of star-shaped blue flowers.	.35
---	-----

LAURI -A recent introduction from the Greek Islands Soft lavender flowers on slender stems. A real gem.	.35
---	-----

PERSICIFOLIA -The peach leaved bell flower. Splen-	
--	--

did spikes of salver shaped blue flowers. In June.	.15
PERSICIFOLIA BACKHOUSEI -One of the best of the things tried during the past year. Large clear white flowers on erect spikes.	.35
PORTENSCHLAGIANA (MURALIS) -A trailing creeper with deep green mats of foliage hidden by a wealth of clear purple bells. Our favorite rock plant	.25
PSEUDO-RAINERI -Wide salver shaped flowers over tufts of pretty leaves	.35
PUSILLA -Tiny thimble-like bells of blue on a six inch high plant.	.35
PUSILLA ALBA -White form of above	.35
ROTUNDIFOLIA -Blue bells of Scotland.	.25
RADDEANA - Round, sharply toothed glossy leaves branching sprays of violet bells	.40
TURBINATA -Large wide open bells on short unbranched stems, dainty blue	.35
CENTAUREA	
DEALBATA -Beautiful soft rosy mauve flowers. Slender border plant, 18 to 24 inches	.25
CERASTIUM	
ALPINUM -Densely hairy leaves, not a rapid spreader,	.35
BIEERSTEINII -Splendid grey foliage and many soft white flowers. Beautiful but too rapid spreader to be planted near choice things.	.15
COLUMNAE Foliage whiter than the above, more profuse in flowering and not invasive.	.35
CERATOSTIGMA	
PLUMBAGINOIDES -Producing masses of leafy shoots which break into heads of azure blue stars in early autumn	.35
CHEIRANTHUS	
LINIFOLIUS--For sunny walls or crevices, six to nine inch wiry stems clothed in cold lilac flowers from spring until winter	.25
CHRYSOGONUM	
VIRGINIANUM -A lovely early spring bloomer, golden daisy like flowers	.25
CLEMATIS	
TANGUITICA -The unusual Chinese yellow clematis, drooping bell shaped flowers from July until autumn. splendid for the large sunny rock garden	.50
COCCINEA -Very unusual and worth while, coral red flowers on a pleasing trailing vine, a good companion to the above.	.50
CONVOLVULUS	
MAURITANICUS -Too tender for exposed places but truly worth a little extra care, fine true blue morning glory blossoms in late summer and fall	.25
CORONILLA	
IBERICA -A dainty trailer with an unending succession of golden pea flowers in pretty heads	.25
CORYDALIS	
ACHROLEUCA -Beautifully cut foliage with small yellow bleeding heart-like flowers. Foliage turns a pleasing red in the fall	.25
GLAUCA -Foliage of beautiful glaucous blue with dainty jewel-like flowers of soft rose-tipped yellow	.25
LUTEA - An all summer bloomer of clear soft yellow with silvery green foliage. Should be more often seen	.25
COTYLEDON	
UMBELLICUS -Low tufts of soft hairy leaves after the fashion of a sempervivum. Odd	.15

CRUCIANELLA

STYLOSA -A profuse ramper, foamy masses of dainty green with many round heads of pink flowers 25

CYCLAMEN

EUROPEUM -The hardy Cyclamen, very rare and much too seldom seen, marbled foliage with pinkish red flowers 1.00

CHRYSANTHEMUM

The plants we offer are all of the so-called early flowering sorts, most of them being in full bloom by October 1.

ALADDIN -The novelty bronze so popular the past two seasons blooming from mid August until frost 25

AMELIA -Lively pink flowers, fully double. Very early unusual and distinct. 35

BARBARA CUMMINGS-A splendid early deep yellow. 15

OCTOBER GIRL -Very clear rose, not as early as the above. 15

NORMANDY -White slightly shaded pink, very good in either garden or for cutting 15

RUTH HATTON -The best white hardy sort to date 15

COREANUM -An unusual single, white aging to light pink, needs to become acclimated before showing what it really can do. 15

COREOPSIS

LANCEOLATA -Valuable border plant, rich golden yellow. 15

DAPHNE CNEORUM -The finest of dwarf shrubs for the rock garden, pink, with exquisite fragrance. 1.00**DELPHINIUM**

BELLADONNA IMPROVED -A fine variety for its clear light blue flowers. 15

GOLD MEDAL HYBRIDS -Erect stiff stems with large individual flowers. Mixed shades of light, medium and dark blue. Large clumps. 25

BLACKMORE AND LANGDON -Named varieties. We offer a few plants each of about twelve selected varieties. These are finer than any other Delphiniums we have seen in America 1.00

ZALIL -The much sought after yellow variety-Blooming size plants 1.00

DIANTHUS

ALPINUS -Large flowers of brilliant rose, likes a little lime in loose loam. 35

ARENARIUS -Flowers white, deeply fringed and fragrant 25

ARVENINSIS -A diminutive form of Caesius, neat, flowers pink, three inches 25

CAESIUS -Makes wonderful mounds of grey green foliage covered during June with quantities of dainty pink flowers .25

CARTHUSIANORUM -A deep pink cluster head pink very slender and dainty 25

CRUENTUS -Very unusual, deep blood-red flowers on slender stems above a dense green tuft of foliage 25

DELTOIDES BRILLIANT -A much improved form of the above, deeper in color .15

DELTOIDES ALBA -Like the type except flowers are white with a ring of pale pink 15

NEGLECTUS -A true Alpine, large clear rose flowers reverse of petals buff. whole plant not exceeding three inches. .40

PLUMARIUS -The clove pink of old time borders, both

6			
single and double mixed			25
SYLVESTRIS -A fine upright pink with clear rose colored flowers			.25
SYLVESTRIS FRIGIDA -A very small form of the above. Very fine			.25
SUPERBUS - Deeply fringed flowers of rosy mauve, very fragrant. Usual			.35
WIMMERI -Blooms all summer in many flowers clusters			.25
DICENTRA			
EXIMEA - The ever blooming plump bleeding heart should be more frequently seen			.25
SPECTABILIS -The old-time bleeding heart.			.35
DICTAMNUS			
FRAXINELLA -The seldom seen gas plant takes time to produce specimen plants but worth the effort Pink			.35
DIERAMA			
PULCHERRIMUM -Fairy's swans, dainty bulbous flow- ers on tall slender stems. Small plants only			.25
DIGITALIS			
The Shirley-Foxgloves are fine for the back of borders, semi-shady places. The choicest variety for all around use.			.25
DRABA			
We have several sorts, all interesting and among the first plants to bloom in the spring. Flowers yellow or white. Mixed only			.15
DORONICUM			
CAUCASICUM -Flowers like large yellow daisies on 16 inches stems. Early May.			.25
DRYAS			
OCTOPETALA A shrubby-like little evergreen making mats of tiny oak leaves with large white eight- petaled flowers			.35
ECHINOPS			
RITRO -The lovely globe thistle with steel-blue globular flowers. Fine for the border. 5 ft.			.25
EPILOBIUM			
NUMMULARIFOLIUM -Diminutive creeper with tiny leaves of metallic bronze. Very dainty and not pernicious.			.25
ERICA			
CARNEA -A very pleasing pink heather. Should be slightly protected to prevent burning when frozen			.50
ERINUS			
ALPINUS - Very dainty leafy rosettes with many small lavender flowers. Fine for the rock wall.			.25
ERYNGIUM			
AMETHYSTINUM - Amethyst blue stems and flowers effective when combined with pink or rose			.15
ERODIUM			
AMANUM -Silvery grey wooly leaves, dainty white flowers all summer.			.75
ERYSIMUM			
PULCHELLUM - A dwarf mat forming species, dark green foliage covered in early spring with yellow flowers			.25
EUPATORIUM			
COELESTINUM -A fine hardy perennial with flowers resembling long stemmed ageratum in late fall.			.20
EUPHORBIA			
CYPARISSIS -Glaucious blue foliage and yellow flow- ers, very pretty but spreads rapidly.			.15

MYRSINITES	Feathery bluish foliage with dense yellow flower heads	25
POLYCHROMA	-Exceptionally good, forms compact round clumps covered during May with intensely yellow heads of flowers.	35
GYPSOPHILA		
FRATENSIS	-A very choice dainty pink baby's breath, not rampant	.35
REPENS	-A trailing plant, fine for rockery or wall White or very pale pink flowers	20
PANICULATA	-The hardy baby's breath, fine for bouquets, Large clumps	25
BRISTOL FAIRY	-A much improved double form of the above. Very choice	40
HELIANTHEMUMS		
(THE SUN ROSES)	are most effective in the rock garden. semi shrubbery with evergreen foliage they offer a wealth of bloom in shades of rose, pink, red, orange or white. Mixed colors only. (Large plants)	.25
HELIANTHUS	Rich yellow double flowers resembling Chrysanthemums, very good combined with hardy asters for the autumn garden	25
HELLEBORUS		
NIGER	-The Christmas Rose, a very interesting plant blooming during mild weather from November to March here in Michigan. Flowers wax-like, pure white aging to pale pink	1.00
ORIENTALIS	-The Lenten Rose, blooming later than the above with more variation in color	1.00
HEMEROCALLIS		
FLAVA	-The well-known fragrant lemon lily	.15
FULVA	-The later blooming tawny orange lily.	.15
THUNBERGII	-A very late flowering sort with clear	
FUNKIA		
LANCIFOLIA	-Dull green leaves lilac-blue bell-shaped lilies, during July and August. Fine for shade	25
FESTUCA		
GLAUCA	-A hardy tufted grass of a beautiful blue shade. Fine for rock garden or border edge. Non-creeping.	20
Fragaria		
INDICA	-The creeping Indian strawberry, yellow flowers, followed by brilliant red fruit.	.15
GENTIANA		
ACAULIS	-The beautiful gentian of the Swiss Alps. Not difficult in a rich porous soil, full sun and plenty of under-ground moisture	50
LAGODECHIANA	-Another very fine gentian easily grown in quite ordinary soil	75
SEPTEMFIDA	Clear blue flowers in mid-summer, quite easy	50
SINO-ORNATA	One of the loveliest gentians, rich dark blue trumpets, give it a diet of rich leaf mold and peat with a bit of mid-day shade	75
GERANIUM		
LANCASTRIENSE	A very fine dwarf rock plant with soft clear pink flowers striped darker, produced over a long period.	50
SANGUINEUM	-Single dark flowers more upright growth than above	35
GLOBULARIA		
CORDIFOLIA	-Evergreen foliage in flat tufts, soft blue flowers	25
NANA	-A very dwarf slow evergreen creeper with tiny blue flowers	40

TRICHOSANTHA	-Taller than the above with large blue flowers	.30
	yellow flowers	.25
HERNIARIA		
CLABRA	-A dark green prostrate carpeting plant, good as ground cover for small bulbs	.15
HEUCHERA		
SANGUINEA	-Beautiful lily of the valley flowers ie shades of coral, red and pink. Very dainty.	.25
PLEU DE FEU	-Very large rich scarlet. Excellent for the border	.35
HOUSTONIA		
COERULEA-BLUET	-One of the finest plants in our gardens. Soft, dainty azure flowers in quantities during May and June	.35
HYSSOPUS		
OFFICINALIS	-Delightfully aromatic and rather pretty with its erect spike of blue or pink flowers	.25
HYPERICUM		
OLYMPICUM	-A very pretty dwarf evergreen plant with large golden star-shaped flowers.	.25
IBERIS		
GIBRALTARICA	-The familiar hardy candytuft.	.25
LITTLE GEM	-A very compact form of sempervivums With pure white flowers.	.35
IRIS		
Our planting consists of a great many of the better varieties of German Iris. We offer a collection of twenty-five, all different, named for		2.00
SIBERICA	-Very fine for cutting or in the garden, we offer the following choice sorts.	
CAESAR	-Splendid dark velvety purple with flaring falls.	2.00
CAESAR'S BROTHER	-A very great improvement in the above variety.	5.00
EMPEROR	-Large deep violet blue.	.25
MRS. ROWE	-Charming lilac pink, very unusual	.50
SNOW QUEEN	-An old favorite, white and gold	.25
IRIS		
DICHOTOMA	-The Vesper Iris, blooming during late July-and August, loose sprays of lilac rose flowers	.35
IRIS		
DWARF.	-The early dwarf Iris coming weeks before the bearded sorts. We offer.	
PUMILA	-Dark rich purple.	.15
MOONLIGHT	-Soft clear yellow	.15
SCHNEECUPPE	-Soft white.	.15
ROYAL PURPLE	-Well named	.15
COERULEA	-A delicate soft blue.	.25
ISATIS		
GLAUCA	-Often called yellow gypsophila; airy heads of fine yellow flowers, followed by interesting black seeds. An interesting border plant.	25
LAVENDULA		
VERA	-Sweet lavender. Dull grey foliage and fragrant lavender flowers	.25
LEONTOPODIUM		
ALPINUM	-The alpine edelweiss, silvery leaves crowned with starry wool-like flowers	.35
LINARIA		
ALPINA	-Tiny snapdragon-like flowers in violet and orange.	.25
DALMATICA	-Tall with golden yellow spikes and blue grey foliage	.15

GLOBOSA -A tidy upright mound forming variety with deep lavender flowers, very choice.	.25
LIATRIS	
PYCNOOSTACHYA - Long narrow spikes of rich purple flowers in mid-summer. 5 to 6 ft. high.	.25
SCARIOSA -Shorter and broader spikes than the above, quite unusual.	.25
LILIUM	
CERNUM- A very choice dwarf lily for the front of border or rock garden, soft delicate pink.	.50
REGALE -The white tubular blooms, widely expanded are shaded chocolate outside, and have a soft yellow throat. Strong bulbs.	.25
TENUIFOLIUM -The Coral Lily-Bright coral scarlet; much recurved flowers, about two inches across when fully open.	.25
TIGRINUM -The cultivated tiger lily, deep orange red spotted black interesting in the border.	.25
UMBELLATUM -The Candle-stick lily holding its flowers upright, shades of orange and red.	.25
AURATUM -The gold-banded lily well opened flowers often 8 to 10 inches in diameter. Should be planted early. Large bulbs.	.40
HENRYI -A very beautiful clear soft yellow lily. Unusually fine. Order this item early.	.40
LINUM	
PERENNE -The intense blue flowers of this flax are always interesting.	.25
LOTUS	
CORNICULATA FL. PL. -Interesting low creeper with deep green foliage and double pea-shaped flowers of clear yellow, tipped orange.	.25
LUPINUS	
HYBRIDS -A fine strain of this popular garden flower, mixed shades of blue, pink and white	.25
LYCHNIS	
ALPINA -Neat little tufts of green with heads of rose colored flowers.	.25
VISCARIA -Brilliant carmine flowers, taller than the above.	.25
LYSIMACHIA	
CILIATA -A fine outstanding border plant, with spikes of yellow flowers in whorls.	.35
NUMMULARIA AUREA -A golden leafed form of well known evergreen creeper.	.35
LYTHRUM	
ROSEUM- Very showy rosy purple spikes about 3 feet high in summer.	.25
MENTHA	
REQUENII -Dense green carpet with tiny violet flowers, the whole plant strong of peppermint.	.25
SPECIES -Another creeping mint, much larger than the above, covered in mid-summer with spikes of lavender flowers. A fine plant.	.35
MERTENSIA	
VIRGINICA -The familiar Virginia blue bell. Very choice.	.25
MICROMERIA	
JULIANA -Wiry stems and spikes of tiny pinkish flowers fragrant.	.25
MYOSOTIS	
We offer the ever blooming blue forgetmenot.	.15
PALUSTRIS ROSEA -The pink forgetmenot, very dainty and pretty.	.15

MONARDA

DIDYMA -Brilliant scarlet flowers over a long period in the summer. 15

OLD ROSE -An interesting old rose-mulberry forf of the above. 25

MATRICARIA

GOLD BALL -A dwarf border plant covered with small yellow ball-like flowers 20

NEPETA

MUSSINI -Low, dense plant with grey foliage and blue flowers. Useful as an edging or in the rockery.

SOUVENIER de ANDRE CHAUDRON -A fine border plant with heads of large blue flowers on 18 inch stems. 35

NIEREMBERGIA

RIVULARIS -Large creamy white cup-shaped flowers all summer on a dwarf creeping plant, needs rich soil and moisture. 25

OMPHALODES

VERNA -Beautiful forgetmenot flowers of intense blue in early spring. A very choice plant for a shady place. 50

ONOSMA

TAURICA -Rough grey green foliage, with quantities of beautiful yellow flowers like small electric lights in clusters. Needs good drainage, full sun. 35

PAPAVER

ALPINA -The charming alpine poppy, in pastel shades. 25

ORIENTALIS -LUCY MOORE -Pure white flowers on stiff stems. 35

ORIENTALIS -MRS. PERRY -Beautiful soft pink, blends with other flowers well. 35

ORIENTALIS -PINK PERFECTION -Not as large as Mrs. Perry but a daintier shade. .35

ORIENTALIS -The old favorite, orange red with large flowers. .15

PENTSTEMON

BARBATUSTORREYI -Spikes 2 or 3 ft. long of BARBATUS TORREYI -Spikes 2 or 3 ft. long of scarlet flowers. June and July. .15

DIGITALIS -White flowers with purple shaded throats, 18 inches. 15

GLABER -Brilliant tubular flowers of bright blue, very pretty. 25

GRANDIFLORUS -Bluish flowers on tall stems in late June. A fine border plant. 25

RUPICOLA -Delightful cherry red blossoms with grey green foliage. Small potted plants. 35

PHLOX

AMOENA -A sheet of bright pink flowers in early May, about 4 inches high. 15

ADSURGENS -A fine western American native, creeping with beautiful soft pink flowers. 40

DIVARICATA -Our beautiful fragrant lavender blue native phlox. Very fine. .15

SUBULATA ALBA -The mossy phlox with prickly evergreen foliage and masses of white flowers in early spring. 15

SUBULATA ROSEA -Like above with rosy-pink flowers. 15

SUBULATA LILACINA -Another variation with pale blue flowers. 15

SUBULATA "APPLEBLOSSOM" -We think this the

best of all, color is well described by its name.	25
DECUSSATA -The hardy border phlox we offer in the following varieties.	
B. COMPTE -Rich amaranth red.	25
ENCHANTRESS -Bright salmon pink.	25
JULES SANDEAU -Clear pure pink.	.25
MRS. JENKINS Pure white.	.25
PHYSALIS	
FRANCHETI -The brilliant Japanese lantern. Very easy to grow.	15
PHYSOSTEGIA	
VIVID -Brilliant pink, very desirable for cutting or border.	15
PHYTUEUMA	
SCHEUCHZERI -Very unusual and dainty alpine, pale clear blue flowers in tiny heads. 4 inches.	40
PLATYCODON	
The favorite balloon flower blooming in mid summer. Blue and white.	25
PLUMBAGO	
LARPENTAE -A valuable blue for late September and October. 8 inches.	25
POTENTILLA	
VERNA NANA -Very dwarf and compact, pure yellow flowers freely produced.	35
TONGUEI -Trailing, clinging close to rock or soil, producing its flowers freely from June until frost. Apricot with deep red centers. A very valuable and charming plant.	50
PRIMULA	
AURICULA -Smooth light green leaves in rosettes, interesting flowers in shades from cream to claret.	35
CASHMERIANA -Large globular heads of lilac flowers. Very early. 12 inches.	50
CORTUSOIDES -Soft crinkly leaves and heads of deep rosy lilac flowers in late May.	25
FRONDOSA -A very dainty lavender primula, the leaves sprinkled with a sulphury white powder.	35
flowers, very choice.	35
HEDGENAE -One of the best dwarfs, very deep claret	
JULIAE -Dwarf mats of glossy foliage and quantities of strry claret flowers with golden centers. Small plants.	35
POLYANTHUS -The bunch flowered primrose. Very choice hybrids.	25
VERIS DOUBLE LAVENDER -Exquisite double flowers freely produced. Unusual and choice.	35
VERIS "QUEEN OF HEAVEN" - A beautiful soft blue primula, our stock is small, so order early	40
PYRETHRUM	
We have a few very choice plants in selected doubles and semi-doubles, mostly clear pink.	40
MIXED HYBRIDS -Fine for border, mixed colors.	.20
RANUNCULUS	
ACRIS FL. PL. -The creeping double buttercup, very pretty but a rapid spreader.	15
SAGINA	
GLABRA AUREA -A tiny plush-like golden mossy plant.	25
SANTOLINA	
INCANA -Beautiful, silver-white foliage. Aromatic. Compact and neat, always very effective.	.15
SALVIA	

ARGENTIA -Large velvety white leaves make this plant interesting in wall or garden.	.15
AZUREA -Produces its sky-blue flowers in great profusion during August and September. 3 to 4 ft.	.15
PRATENSIS -Deep blue flowers on stems during June and July.	.15

SOPONARIA

OCYMOIDES -Pretty prostrate plant, flowers of rose pink, freely produced. Not a bad spreader but needs room and should be cut back hard immediately after blooming.	.15
---	-----

SAXIFRAGA

APICULATA -Mats of tiny rosettes with yellow flowers. Needs ground moisture but good drainage.	.35
AIZOON PARADOXA -Very handsome rosettes.	.50
rosettes. Very choice.	.35
AIZOON PARADOJA -Very handsome rosettes	.50
COTYLEDON PYRAMIDALIS -One of the showiest of all saxifragas. Large rosettes deeply edged silver and tall flower stems of white speckled red flowers.	.25
LONGIFOLIA LOWNII -Very long slender leaves making a very gracefull rosette.	.75
MCNABIANA -Symmetrical rosettes of deeply incrustated leaves. Very fine.	.25
DECIEPENS--The creeping mossy rock foil forming mats of evergreen foliage and completely covered with white or pale pink flowers in late April.	.25
BATHONIENSIS -A pleasing pink form otherwise much like the above.	.35
VIRGINIENSIS -Leathery dented leaves, sprays of white flowers. Needs moisture during its blooming season.	.35
MEGASEA CORDIFOLIA -Broad leathery leaves, rose pink flowers in clusters.	.25

SEDUM

ACRE -Evergreen mats with yellow flowers, 2 in.	.15
ACRE MAJOR -Unlike the above, a slow spreader and silvery green.	.35
ACRE MINUS -A very tiny form not exceeding 1-2 inch. Very choice.	.25
ACRE AUREA -Deep green leaves, stems golden tipped.	.15
ALBUM MURALE -Pale pink flowers in soft airy masses.	.15
ALBUM -Thick deep green leaves with pure white flowers.	.15
ALBUM BREVIFOLIUM -Very compact and small leaved form.	.15
ALBUM PURPUREUM -Beautifully deep purple or mahogany colored leaves during winter and spring.	.15
ALBUM TENUIFOLIUM -Larger slender leaves on drooping stems.	.15
ALTISSIMUM -Thick grayish leaves, greenish yellow interesting flowers.	.15
ANACAMPSEROS -Glaucious leaves, very beautiful during fall and winter.	.15
ANOPETALUM -Very pretty deep green form, very distinct.	.15
ANGLICUM -Grey green mat with pearly white flowers.	.15
BALTICUM -Brilliant green tiny bead-like leaves. Very uncommon.	.25

DASYPHYLLUM	-Blue grey cushion tinged pink.	.25
DASYPHYLLUM MACROPHYLLUM	-A large form of the preceding.	25
